The following is an examiner's statement of reasons for allowance:

The prior art of record, either alone or in combination, fails to anticipate or render obvious the herein claimed hydraulic binder comprising cement, moist green vitriol and catalytic dust. The prior art further fails to teach a hydraulic binder comprising cement, moist green vitriol, silica gel or alumina, and an acidifying agent. There is no motivation for the addition of catalytic dust, alumina or silica gel to a vitriol containing binder with any expectation that the binder will still function as desired. .

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
